Hiring Manager
UNOPS

Dear Hiring Manager,

I am writing to express my strong interest in the UNWB SoftwareEngineer position at UNOPS, as advertised. With extensive experience as a Senior Software Engineer—particularly in developing robust, scalable, and innovative software solutions—I am confident in my ability to contribute effectively to the development, testing, and maintenance of your UNWB platform.

At BEBRIDGE AI, I spearheaded projects that mirror the core responsibilities outlined for this role. For instance, I developed a RAG-based AI chatbot that not only reduced costs by 90% but also secured a key B2B contract, demonstrating my aptitude for implementing new functionality that meets business needs. Additionally, my work in designing and deploying a global AWS/GCP infrastructure for a customer-facing product reduced latency by over 50% for international users, ensuring optimal performance and scalability.

I have also streamlined testing and deployment processes by incorporating DORA metrics, which reduced deployment times by 90% and doubled our release frequency. This experience aligns closely with the UNOPS emphasis on rigorous testing and continuous improvement of platform functionality. Moreover, I have a proven track record of enhancing existing systems—such as building a feature-rich admin panel that boosted customer support efficiency by 40%—which speaks to my commitment to maintaining and evolving software in line with operational needs.

Beyond technical achievements, I played a pivotal role in team-building as the first employee hired alongside the Founder, recruiting and mentoring the entire development team. This experience has instilled in me the importance of collaboration, respect, and quality, which I am eager to bring to the UNOPS team.

I am excited about the prospect of contributing to UNOPS's mission by ensuring that the UNWB platform continues to deliver optimal performance, reliability, and user satisfaction. I welcome the opportunity to further discuss how my background and skills can align with your strategic goals.

Sincerely,

Adriel Niyodusaba
