

SUMMARY

Self-driven and curious Senior Software Engineer with well-rounded experience in frontend and backend development, infrastructure/DevOps, and AI-powered solutions. Thrives in fast-paced startup environments, delivering impactful results across the full software development lifecycle.

PROFESSIONAL EXPERIENCE

Senior Software Engineer, BEBRIDGE AI

Seoul, South Korea | Dec 2020 – Present

AI Solutions Development:

- **RAG Chatbot:** Developed a reliable AI chatbot that answers questions based entirely on customer-provided video content. Implemented caching to lower cost by 90%, securing a B2B contract. (*Transcription, Embedding, Vector Database, LLMs*)
- **Video to Article AI Pipeline:** Created an AI-powered pipeline to generate high quality blog articles from customer videos, leading to more than three contracts with large content companies in Korea like Hunet and 3Pro (*Transcription, Topic Modeling, LLMs, FFMPEG, FastAPI, GCS, MySQL*)

Infrastructure and DevOps Leadership:

- Designed and led deployment of a global infrastructure across AWS and GCP for Slid, a customer facing product with thousands of weekly users. Reduced latency by more than 50% in the US and Europe, making the product usable outside Korea.
- Optimized Deployment Processes and implemented DORA metrics using Swarmia and Agile methodologies, reducing deployment times by over 90%, doubling deployment frequency, and significantly improving team productivity.

Backend Development:

- Developed revenue-critical backend systems: Built a recurring payments platform processing over 50% of company revenue and implemented a usage-based pricing model, increasing conversion rates by 20%. (*Python, Django, Node.js, AWS*)
- Enhanced customer support efficiency by developing a feature-rich admin panel, boosting team productivity by 40% and enabling timely handling of customer inquiries. (*Python, Django*)

Frontend Development:

- Developed cross-platform desktop applications for Mac and Windows, delivering 17 releases in 7 months, used by over 33% of a 40,000+ user base. (*JavaScript, React, Electron*)

EDUCATION & CERTIFICATIONS

- **B.Sc. in Biotechnology**, Yonsei University, Seoul, South Korea (2017–2022)
- **AWS Certified Solutions Architect – Associate** (Valid until May 2025)

SKILLS

- **Programming Languages:** Python, TypeScript/Javascript, Rust
- **Technologies & Tools:** AWS, GCP, CI/CD, Serverless, SQL/NoSQL Databases, Linux, Django, FastAPI, React, Redux, LLMs, RAG, Agents, Vector DBs, Docker
- **Expertise:** AI Solutions Development, System Design, Cloud & API Development, Frontend & Cross-Platform Desktop Applications, FinOps, Team Leadership
- **Languages:** English (Fluent), Kinyarwanda (Native), Korean (Intermediate), French (Basic)

AWARDS & HONORS

- **Academic Excellence Award**, Yonsei University (2019)
- **Grand Prize**, Korean Speech Contest, Silla University (2016)
- **Korean Government Scholarship** (2016)
- **Grand Prize**, National Science Competition, Physics (2014)
