engineeradriel.com · Seoul, South Korea · Open to US / Canada / Remote

SUMMARY

Software Engineer with 4+ years building **production AI systems** in media and language technology. Core engineer on products serving **50,000+ users**. Built AI pipelines that **reduced human dubbing time by 90%** and generated **over half of company revenue**. Strong background in RAG systems, speech/video AI, agent pipelines, and cloud-native deployment, with growing focus on **security and AI safety**.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Go, Rust

Backend: Django, FastAPI, Node.js, NestJS, Gin | **AI/ML:** LangChain, LangGraph, Autogen, RAG, LLMs, TTS, STT, LipSync

Infrastructure: AWS, GCP, Docker, Kubernetes, Terraform | **Data:** PostgreSQL, MongoDB, MySQL, Redis, Pinecone

Other: ffmpeg, audio/video pipelines, Web3 wallet development, DeFi monitoring, smart contracts

EXPERIENCE

Software Engineer — AI & Backend | Bebridge · Seoul | Dec 2020 – Present

Lead engineer on SaaS products Slid, Summary, and DipClip; later expanded into B2B media AI and client projects.

Slid — AI Note-Taking Platform (*Lead Engineer*) - Joined as one of **first two engineers**; evolved from frontend intern to **lead engineer owning core product systems** - Built cross-platform **desktop app (macOS/Windows)** from scratch with code signing and releases — grew to **~50% of active users** - Owned **entire backend and cloud infrastructure** (APIs, databases, background jobs, deployments) - Built **global infrastructure** reducing international latency and enabling worldwide usage - Designed and implemented **recurring subscription payments**, enabling sustainable monetization and long-term growth - Introduced **AI transcription (Whisper)** during hackathon — became foundation of Slid's core Auto-Note feature - Represented Slid at **CES 2023 (Las Vegas)**, presenting the product to international audience

Summary — AI Video Digest App (*Lead Backend Engineer*) - Built and owned **backend and AI pipeline** delivering automatic summaries of new YouTube videos to **~10,000 users** - Designed channel pooling system monitoring **thousands of channels** with near-real-time processing - Implemented end-to-end pipeline: video ingestion → transcription → LLM summarization → notification - Optimized processing workflows to balance **cost, speed, and quality** in production AI workloads

DipClip — AI Short-Form Video Platform (*Lead Backend/AI Engineer*) - Built **core AI pipeline** converting long-form videos into short, reel-style segments for **~5,000 users** - Designed algorithms to identify key moments and generate **time-range annotations** for seamless playback

Proteus — AI Dubbing Agent (*Lead AI Engineer*) - Built AI agent for **multilingual video dubbing**: ingestion → transcription → translation → voice cloning → duration-matched output - **Reduced human dubbing time by ~90%**; became **core revenue driver** generating **>50% of company revenue**, secured **10+ B2B contracts** - Contributed to **web-based dubbing studio** for human-in-the-loop review, corrections, and approval workflows

SELECTED PROJECTS

KOHI — Course Knowledge Graph · Multi-level graph visualization + semantic search over thousands of courses using Pinecone embeddings; combined data engineering, AI search, and UX-driven system design

3Pro Investor Advisor · Financial chatbot with RAG over Wall Street YouTube interviews; automated ingestion with source video timestamps for transparency and trust

Korean TTS & Lip-Sync (2025) · Benchmarked and deployed production Korean TTS (GPT-SoVITS, XTTS-v2, MeloTTS) and lip-sync models (MuseTalk, LatentSync) for client-specific performance and quality needs

Crypto Wallet & DeFi (2026) · Designing wallet security mechanisms and gas optimization; real-time Aave/Compound health monitoring; fund-rescue smart contract development

EDUCATION & CREDENTIALS

BSc Bioengineering — Yonsei University (2022) | **AWS Solutions Architect – Associate**

AWARDS & ADDITIONAL

National Science Grand Prize (Physics) · Korean Government Scholarship · Yonsei Academic Excellence · Korean Speech Contest Grand Prize · Slid Hero Award (Transparency) · Bebridge Hero Award (Focusing on Real Value)

CES 2023 Presenter (Las Vegas) · **Silicon Valley Immersion** (Dec 2025) · **Open Source: Tenuo** — AI agent security framework

Languages: English (Fluent) · Korean (Advanced) · Kinyarwanda (Native) · French (Intermediate)
